# Journal of Computer Science & Systems Biology

Open Access

# EDITORS & EDITORIAL BOARD

Journal of Computer Science & Systems Biology (JCSB), a broad-based journal was founded on two key tenets: To publish the most exciting researches with respect to the subjects of Applied Computer Science & Systems Biology. Secondly, to provide a rapid turn-around time possible for reviewing and publishing, and to disseminate the articles freely for research, teaching and reference purposes. Systems Biology is a sustaining and prolonging effort to discover and alter human knowledge and understand number of trends in bioscience research. It is a "field of study" as well as "the paradigm".

in Open Access category publishes innovational and germinal research papers with relevant case studies.

The objective of JCSB is to provide a global forum for commuting results of germinal research thoughts and perceptions in both computer science and systems biology in the fields of biomedicine, computational science and healthcare.

JCSB focuses on articles that report new and refreshing approaches of wide healthcare importance "in and with" the fields of support systems, medical and clinical diagnosis, data and knowledge mining, artificial intelligence and information technology.

Journal of Computer Science & Systems Biology- Open Access using online manuscript submission, review and tracking systems of Editorial Manager® for quality and quick review processing. Submit your manuscript at <http://www.editorialmanager.com/systemsbiology>
